 Tag

The "br" tag in HTML is a line break tag that is
used to insert a single line break

In this example, the "br" tag is used to create a line break
between "This is the first line" and "This is the second line".
When the web browser displays the text, it will show the first
line followed by a line break and then the second line.

```
<p>This is the first line.<br>This is the second line.</p>
```

Anchor Tag

An anchor tag, also known as an <a> tag, is an HTML tag used to create a hyperlink to another web page, file, or location on the same web page. The syntax for creating an anchor tag in HTML is:

Here's an example

```
<a href="destination">link text</a>
```

Image Tag

The image tag in HTML is used to display images on a web page. The syntax for creating an image tag in HTML is:

```html
<img src="image_url" alt="image_description">
```

This code would display an image of a mountain landscape, with the alternate text "A beautiful mountain landscape" in case the image fails to load or cannot be displayed.

```html
<img src="https://example.com/image.jpg" alt="A beautiful mountain landscape">
```
